About probiotics and Bulgar Biotic:

We live in times of stress and uncertainty. We are in a hurry, we work, we win, we laugh, we fight our emotions ... Until one day we realize that we are about to lose the most precious gift given to us at birth - **health**. That is why Bulgar Biotic turns to **Lactobacillus bulgaricus** - the first natural probiotic in the world. The long and healthy life of the Bulgarian people was the result of the daily consumption of fermented milk and other lactic acid products produced in Bulgaria, which still remain the most beneficial for the Bulgarians.

Combining the deep traditions of extracting **the most valuable natural ingredients and advanced production technologies**, Bulgar Biotic offers the highest quality probiotics with the brand name "Bactojoy" and Lactobacillus bulgaricus!

Our mission is to help people feel healthier, more energetic and smiling.

Product description:

Bactojoy Immune Complex is a new generation synbiotic produced in Bulgaria based on the **authentic Lactobacillus bulgaricus**. Provides **strong immunity** by helping to build immunological protection against upper respiratory tract diseases and viral infections. **Reduces inflammation**. Supports the natural production of short-chain fatty acids. Supports **the normal functioning of the gastro-intestinal tract** and strengthens the protective functions of the body. Contributes to **natural detox of the body**. It has a beneficial effect on cholesterol metabolism.

In what case it is offered to the client and how it helps :

- As **prophylaxis**:
 - o in the fight against viral infections;
 - o to maintain favorable gastrointestinal flora;
 - o during periods of increased stress;
 - o in season changings;
- As **accompanying treatment**:
 - o when restoring the balance of the gastrointestinal flora;
 - o during antibiotic treatment and after antibiotic treatment;
 - o in cases of irritable bowel syndrome.

Key benefits:

- As a prebiotic the product contains the **more innovative and much more active arabinogalactan** instead of the common prebiotic analogues;
- **Clinical trials** have been conducted in Bulgaria for the product's effect;
- Contains **colostrum** - one of the strongest immunomodulators;
- The activity of micro-organisms is **3x10⁹ cfu/g** by production date.
- **A unique combination of probiotic strains** of the Lactobacillus family to achieve the most beneficial effect on the human gastrointestinal flora.

Quality guarantee:

Bulgar Biotic is an innovative company, specialized in production of probiotics and probiotic products with a professional look at the traditions and the latest developments in science.
